CON#432

DoK Supply Contract - Potable Water Pressurized Sand Filtration System

Issue Date	December 2, 2022
Submission Time	January 19, 2023, 2:30 PM (local time)
Contact Person	Holly Thomopoulos (engineering@kitimat.ca)

The standards for the various processes are included within the scope of supply. The supplied goods will be installed by a General Contractor within a heated building provided by a yet to be determined Building Contractor. The building will be designed around the selection of equipment within this scope. The proponent will clearly define the scope of supply included within the package. This will include a specific list of battery limits to provide a concise indication of the District and General Contractor's responsibility. Proponent will provide a preliminary commissioning plan with the tender package. Within the plan, the Supply Contractor must define the point during commissioning where the District Operator of Record provides control to allow water to be connected into the community distribution system. Prior to this point, Supply Contractor is to provide an estimation of water volume for disposal during the commissioning.

Invitation to Proposal	December 2, 2022
Optional request for additional operational information and/or design criteria	December 21, 2022
Final Date for questions	January 4, 2023
Responses to Proponents questions	January 11, 2023
Closing Date	January 19, 2023
