

## Addendum #2

Issued: March 2, 2020

### Description of Addendum

The purpose of this Addendum is to address Proponent enquiries and clarify the intent of the Request for Proposals for Environmental Services.

### Deletion with Replacement

Not applicable.

### Proponent Enquiries

#### Question #1

**Source**

n/a

**Request**

Will the existing instream piers be removed. This may be a bigger environmental concern than installing the bridge itself and will influence level of effort.

**Response**

The District confirms the existing bridge will be removed as part of this Project. It is expected that this will occur after the construction of the new bridge.

#### Question #2

**Source**

n/a

**Request**

Do you know if the land on the northwest side of bridge is public or private? – this may also influence level of effort on wildlife values

**Response**

Proponents are encouraged to visit [KITIMAP.ca](http://KITIMAP.ca) for GIS mapping of the Project area.

The District has not confirmed the property requirements for this Project. It anticipates this may be required as part of the Owner's Engineers' scope of work in developing a Reference Concept Design, and the technical specifications / design and construction requirements for the Project's Design-Build Agreement.

**All other terms and conditions of the Request for Proposals for Environmental Services remain unchanged.**

**End of Addendum #2.**
