## Application Requirements for Temporary Construction Trailers:

- Site Plan showing dimensions from trailer to property lines and to existing buildings
- Certified for local snow load or alternate solution in place ( single units only)
- Construction Trailer Complex's require Professional Certification to the Building Code with respect to:
  - Roof Snow Load, structure, foundation support and seismic restraint
- Acceptable Ingress/Egress including ramps, stairs, handrails, guards handrails, slip resistance surface and contrasting nosing
- Spatial separation from existing buildings and property lines must be considered;
- Water and sanitary sewer location/connection plan is required if a washroom is provided
- A cash security of \$1,000 per trailer to ensure the trailer is removed and the site is left clean (required at permit issuance)

In consideration of the granting of the above application, I hereby agree to conform to the requirements of all pertinent statutes and bylaws, and do further undertake to remove said trailer from said property immediately upon or prior to the expiration of said permit, failing which the City may undertake the work and apply the security to the cost. Further, I/We acknowledge that the issuance of this permit does not signify that the structure authorized by the permit complies with the B.C. Building Code, except to the extent specifically required by Part 13 of the Kitimat Municipal Code. The permit holder is solely responsible for ensuring that the structure is safe to occupy.
