Honourable Mayor and Council

I am writing with regards to the "Civeo Lodge Project" it has come to my attention that the project planned has been disregarded.

I was at every town hall meeting regarding the layout of the proposed plan. The drawings showed a beautiful landscaped and full lodge. With commercial kitchen, cafeteria and fitness room, also a lovely town clock. This building was impressive and for the vicinity of the project, would leave a building that in the future could have some value.

Now, there is a plan to put in more Atco trailers? I feel, I did not join in every council meeting and town hall meeting to endorse trailers. Civeo has had plenty of time to get this "Lodge" project underway with the trailers that are already on site, which I might add is already an eyesore. Adding more is just saying, that the Lodge will not go ahead as proposed.

It seems they are trying to pull the wool over our town peoples eyes.

The LNG project has just begun, and giving way, to changing as you go, seems in my opinion not a very wise thing to consider.

Others will come, and if you allow this change to happen, you are now opening the door to other situations that you will have no justifiable reason to object.

The people of Kitimat opposed this camp even being in town, but with the conceptual drawings, most had reconsidered.

Please consider carefully what the people of this town expect from our Mayor and Council and I truly mean that with no disrespect.

Do not open the proverbial "can of worms" you cannot close.

This should not even be on the table. It is not what I and many others had supported.

Civeo will have the use of all our town facilities, should they not have to give something back in return?

Standing by their word to begin with, would be a great start to a healthy, lengthy relationship.

Thank you for your time
