

To: Mayor and Council Members

I am writing to you today to express my views of the proposal for the TSW to build this monstrosity of a building on 461 Quatsino and rezoning and the changing of the O.C.P.

I'm not in favor of this building or rezoning or O.C.P. change.

This building is smack in the centre of a residential area, it will look out of place, not to mention all the privacy which will be lost to the surrounding neighbors. They built their homes there for their serenity and private surroundings.

I don't think this is the appropriate location for a centre of the type.

This building in my opinion would be more suited in the mountain view square along with other commercial buildings.

How would you feel if this building was built right behind your house? Or on your property line where your privacy will be gone, and where your children could come in contact with addicts exchanging needles. Of course, you would protect them from that.

The residents in the meadows deserve the same consideration.

This proposed mixed use does not conform to that of a residential area.

Please reconsider the rezoning and changing the O.C.P.

The whole downtown plan is a mess in the 1970's the mountain view square could have been developed properly but it turned into a mess. A Hodge podge. The downtown building set up is a mess. The planning department and council had a chance to make it right with the development of the mountain view square, but made that area a mess as well.
