

GREAT CAUSE.....WRONG LOCATION

To: mayor and council

Regarding 461 Quatsino Blvd.

I have a couple of question and statements.

How and Where on the lot are all the buildings located?

How tall is the proposed building?

How wide is the proposed building?

How long is the proposed building?

With the proposed building, be 4 stories high are you concerned or given consideration to the amount of shade it will cause to the neighboring properties with gardens and fruit trees. This will have an impact on my and my family's life style and hobbies. One of the reasons I bought this property in 2000 was for the long sun exposure along with the ability to grow my own vegetables and to have fruit trees. This is a source of food for me and my family. This building at that Hight will restrict the growing ability and amount of sunshine for my garden. Im concerned with the amount of shading and the effects it will have on my vegetable garden & fruit trees.

I have been told that we have a problem the amount of sewer going to the pollution control centre. What have you done to alleviate the problem with over loading the septic system to the pollution control centre?

With the Proposed building going to the proposed location at 461 Quatsino and it being 4 stories high. have you given consideration to the neighboring properties and their privacy. That is another reason why I decided to build my dream home in the residential location on cranberry st.

Thank you, mayor and council, I'm hoping you will take everything you hear read and see tonight into consideration with the final decision on the rezoning.
