

NATURE

Focus on industry, not enough on nature
* Marvel of nature + industry *

Access for NOVICE users (Jesse Lake)
+ education on safe access - water + land

Access seems paused due to industry
- bridge timelines (LNGC → KUNG is long term limits)

Common Concern - Access for residents

How do the two uses co-exist?

nature industry

Rushing approvals for projects w/o knowing
Full impacts (Bish)

Level of 'park' development

↳ natural v. built play areas

* designate protected areas

CULTURE

&

SOCIETY

ecotourism

potential

- market promotion

ECONOMY

partnerships w/ Haisla too

ATV?

snowmobile club - positive
some trails may be too developed for motorized...
motorized vehicles also improve access

maintenance of existing trails is already a challenge. ~~why~~ add more?

can we negotiate rec. offsets w/ industry?

infrastructure + structures

- balance existing w/ new
- see use of MBW first

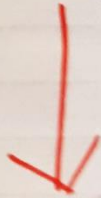

doesn't include simple access trails

Focus on what permanent recreational assets we have
α rundown campsites in town
α revit. recreation closer to town first

top priority

Security
Step 1

* designate park/protected land *
& don't rush plan → implementation

Usable land

not just red areas
