

CONSTRUCTION NOTIFICATION

Coastal GasLink is committed to creating an extraordinary legacy of safety and respect for all people, communities and the environment. As part of this commitment we are keeping our neighbours along the project route informed on construction activities happening near their community. Please note the following information:

What: As part of Coastal GasLink's construction activities and water management, we will be undertaking a culvert installation near the Coastal GasLink Kitimat Meter Station. There may be traffic interruptions during the culvert installation.

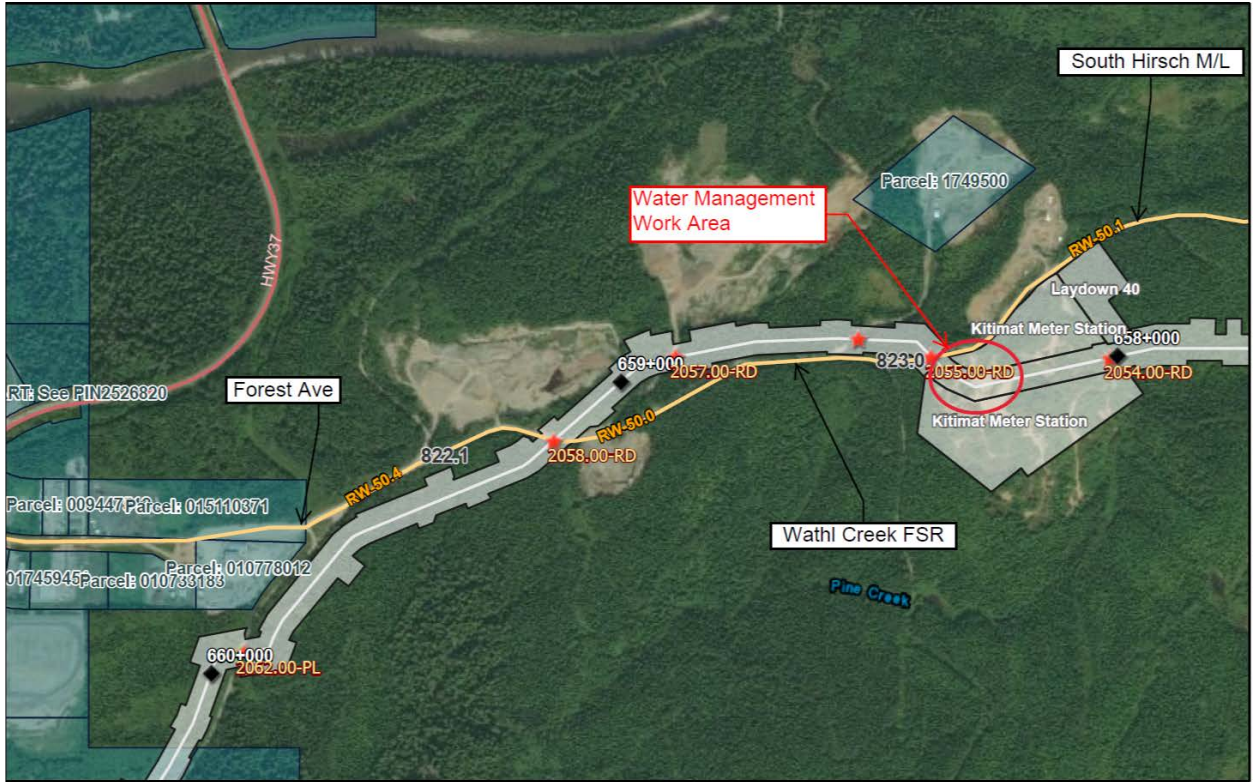

When: Beginning as early as May 26, 2021, preparation activities will begin followed immediately by installation. It is possible that the South Hirsch Mainline may experience periodic traffic delays occurring daily between 7 a.m. and 7 p.m.

Where: Installation activities will occur within the Coastal GasLink Kitimat Meter Station and South Hirsch Mainline.

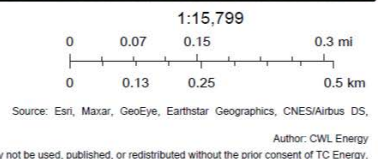

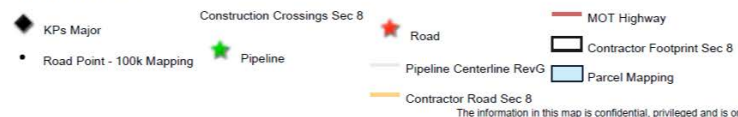

Expected Duration: Preparation and installation activities are expected to occur between May 26 to June 7 and will take approximately three days once started to complete. This timeframe allocates additional time for potential weather or construction delays.

Potential Impact: While there are no anticipated permanent road closures required as part of this activity, there may be brief periods of time when road access will be interrupted for installation activities. Additional signage and flagging personnel will be present (as required) to help guide traffic for residents and community members.

Map: Please see the following page.

6/26/2020, 3:04:51 PM

Questions regarding these activities or general project construction can be directed via email to coastalgaslink@tcenergy.com or by phone to 1-855-633-2011.
